- > Time to first copy: 9.2 seconds or less
- > Professional print, copy, scan and fax functionality†
- > Paper capacity up to 1,600 sheets and a range of paper-handling options
- > Easy to install and operate
- > Easy to use wizard-style navigation
- > Low noise emissions match desktop printers
- > Compact, 360° all-round stylish design to match any office
- > Ecosys Long-life components provide unprecedented efficiency and reliability
- > Exceptionally low printing costs in its class

ECOSYS stands for ECology, ECONomy and SYS tem-printing. With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly and the drum unit every 300,000 pages. The modular design concept allows you to add work flow enhancing functions as required. Integrated system software provides long term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

PRESCRIBE IIe

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (multipart forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

The KYOCERA Net Viewer

The KYOCERA Net Viewer enables complete monitoring and control of all ECOSYS® printers and digital Kyocera multifunction units from any Windows® PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

Status Monitor and Command Centre

The Status Monitor shows the current printers condition and gives direct access to the Command Center for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).

USB Host Interface for USB Flash Memory

PDF files can be printed directly from a USB Flash Memory (e.g. USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.
