

Kyocera Cloud Print & Scan Lite

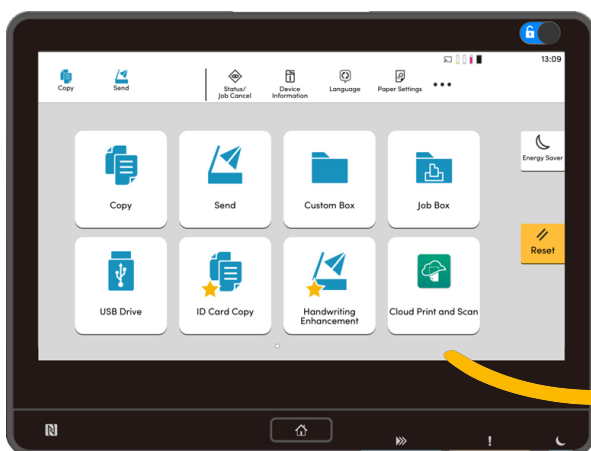

Kyocera Cloud Print & Scan Lite (KCPS Lite) is a new embedded solution that gives you all the features and benefits of the full version, without the need for user authentication before every print and scan.

Once installed on your native device, KCPS Lite will appear on the home screen and can be accessed when you require secure printing or scanning. This will give organisations the freedom to offer users the following functionalities, whilst still allowing standard device photocopying, scanning, faxing and printing usage*.

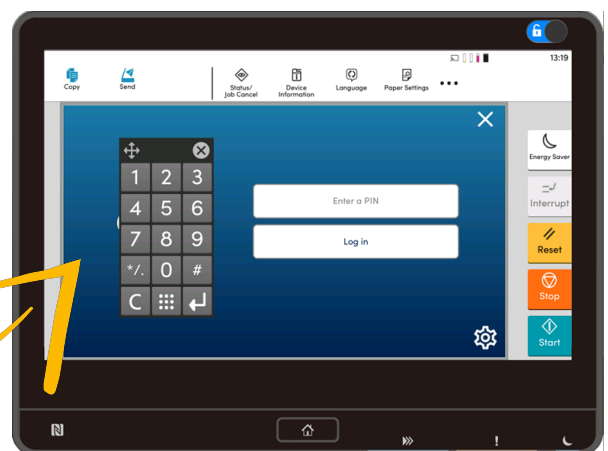

KCPS Lite functionalities include:

- Cloud printing (both workstation and mobile device)
- 3rd party cloud scanning (scanning to Google Drive, OneDrive, SharePoint 365 & Box)
- 3rd party cloud printing (printing from Google Drive, OneDrive, SharePoint 365 & Box)

Embed KCPS Lite on your device

Access secure printing and scanning when you need it

*Unrestricted functions will not be tracked or reported against individual users.
