

Kyocera security is Keypoint certified

Security, Kyocera's signature dish, is at the heart of all our innovative devices.

 The Evolution Series has been awarded BLI Validation.

 Kyocera is an industry leader in this field.

Our signature features

When it comes to security, we take no risks. Our award-winning security measures are available as standard with our TASKalfa 3554ci Series and is another example of why security is our forte. Discover some of its state-of-the-art features:

 **Stick to the rules!**
End-of-life sanitisation compliantly removes data when you choose.

 **Watch like a hawk!**
Devices that detects unapproved changes or access.

 **Hit the ground running!**
Set up MFPs with the highest level of protection quickly and easily.

 **Leave nothing to chance!**
Our complete security stops hackers through encrypted networks.

They say the secret to success is a solid foundation and a strongest defense:

- 1 Work together securely without cybersecurity threats.
- 2 Boost your reputation as a reliable and compliant firm.
- 3 Avoid costly data breach penalties and save money.
- 4 Get industry-leading security available from day one.
